

# “Global Power City Index YEARBOOK 2013” will be released in January 2014!

Attached CD-R contains :

- the each city's score of 70 indicators
- some principle data to make up the indicators such as GDPs,
- and more.

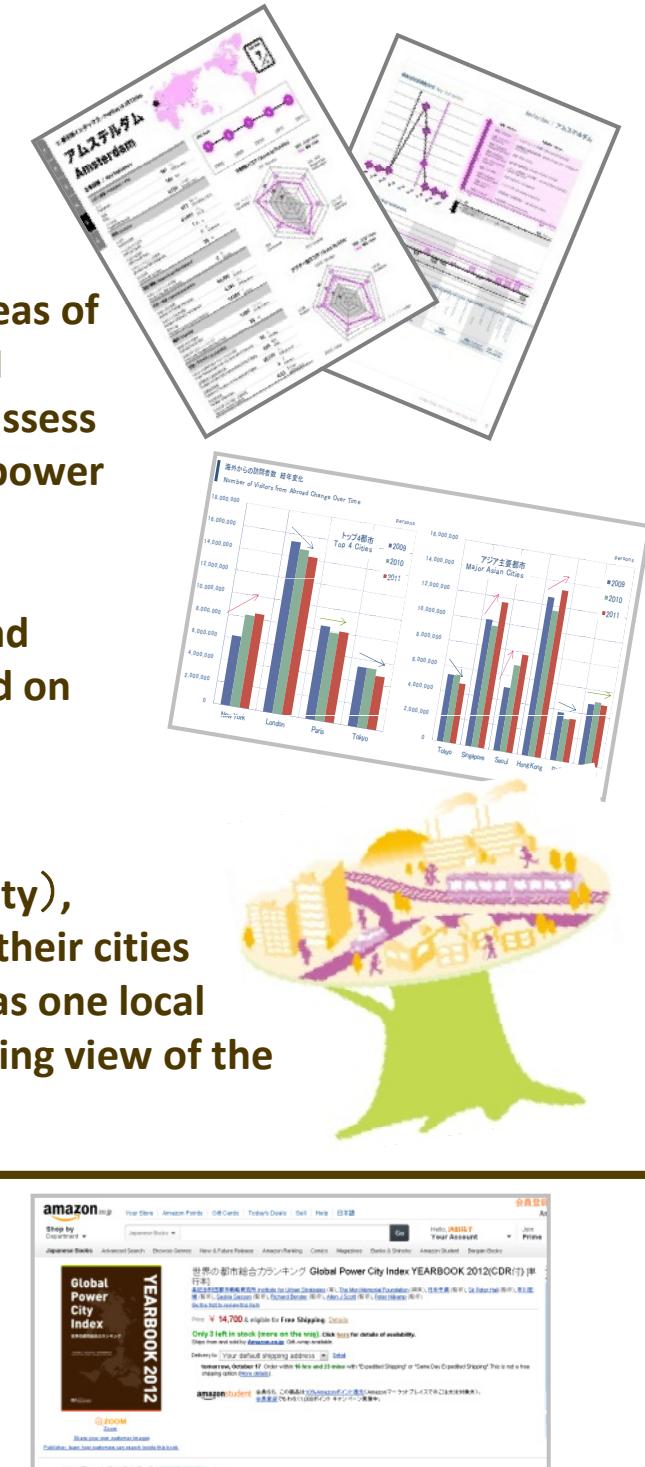

The GPCI YEAR BOOK 2013 includes more detailed data from indicators and analyses by city.  
You can order from Amazon!

## Features of the Global Power City Index

1. The GPCI is the first attempt made by a research institute in Japan to analyze and rank the comprehensive power of the world's major cities.
2. As opposed to limiting the ranking to particular areas of research such as 'Finance' and 'Livability,' the GPCI focuses on a wide variety of functions in order to assess and rank the global potential and comprehensive power of a city.
3. Forty of the world's leading cities were selected and their global comprehensive power evaluated based on the following viewpoints; six main functions representing city strength (Economy, Research and Development, Cultural Interaction, Livability, Environment and Accessibility), four global actors who lead the urban activities in their cities (Manager, Researcher, Artist and Visitor) as well as one local actor (Resident), thus providing an all-encompassing view of the cities.

How To Order

please order through  
Amazon.co.jp (in English)

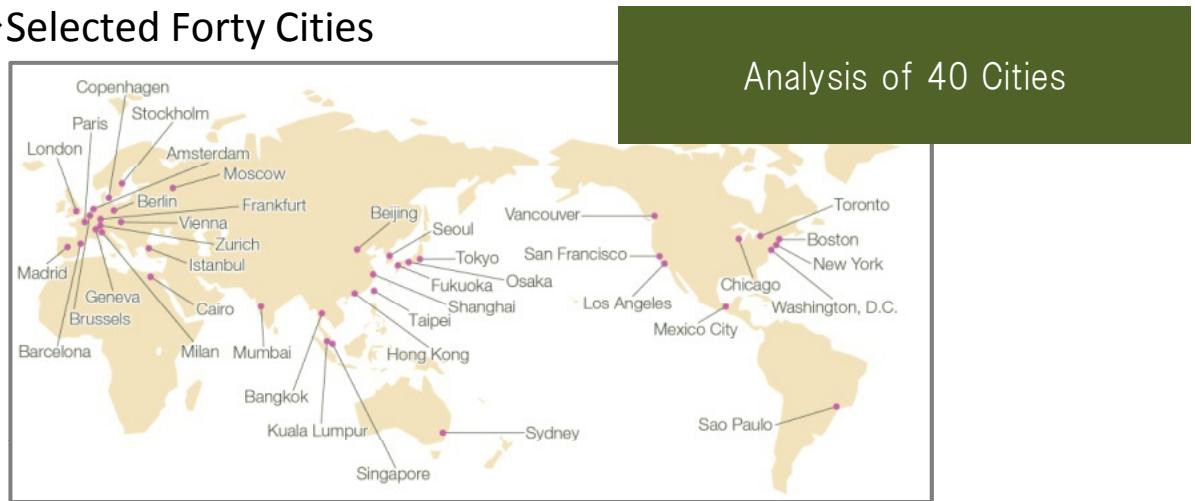

Structure : A4 size/about 400 pages + CD-ROM  
Language : Japanese and English  
Price (Tax inclusive): It will be sold for JPY 14,000
